TAPE ALR MVT

reinforced aluminium foil tape

Tape ALR MVT is a high-performance insulation reinforced aluminium foil tape. It is designed for use as a joining and covering tape for Pyrotek aluminium foil faced products such as Quadzero MVT. Pipeline operating and ambient temperatures can create perfect conditions for moisture buildup inside insulated equipment. The low permeability properties of Tape ALR MVT blocks moisture entry into the insulation system, maintaining its thermal performance, and preventing corrosion under insulation (CUI).

The reinforcing mesh in Tape ALR MVT provides good mechanical stability during application and once in place prevents further movement. The nature of the tape is such that it provides a rare combination of high strength, flexibility and conformability.

The pressure sensitive adhesive backing on Tape ALR MVT which is a modified acrylic/rubber-based formulation gives a high initial tack and holding power.

The backing is protected by a silicone coated, removable release paper which provides easy release properties and aids ease of application.

SURFACE PREPARATION

• Surfaces must be smooth, clean and free from grease, loose or flaking paint, dirt, and contaminants.
• Surfaces can be cleaned with a degreasing solvent cleaner before applying the product
• Pressure should be used when applying to any surface
• Adhesion tests are recommended for powder coated surfaces
• Ageing trials should be performed on plasticised PVC
• Ideal for sealing joints and strengthening mechanical fasteners or fixings. Not to be used as mechanical joining devices
• It is essential, that the user evaluate product suitability for a particular application.

STORAGE AND SHELF LIFE

Tape ALR MVT needs to be stored away from direct sunlight in a clean, and dry environment with a stable temperature of between +10 to +40 °C (+50 to 104 °F). It will have a shelf life of 12 months from the date of purchase if stored correctly.

</table>
| Available | Standard width: 48 mm, 72 mm (1.9, 2.8 in)  
| | Standard roll length: 50 m (164 ft)  
| | Custom sizes available depending on MOQ |

APPLICATIONS

• Liquefied natural gas (LNG) and cryogenic pipes
• Wrapped around other noisy pipes, valves and fan casings e.g. fluid or gas pulsation in chemical, petrochemical and waste water treatment plants
• Compressor jackets where acoustic and thermal treatment is required

FEATURES

• High-performance synthetic pressure sensitive adhesive backing
• Polyethylene fibre mesh/film composite reinforced aluminium foil
• High initial tack and grab
• Broad operating temperature range
• High-performance in heat, humidity and environmental conditions
• Resistant to dust, oils and solvents
• Reflects and insulates against heat
• Easily cut, shaped and fabricated
• Puncture and tear resistant
• Tougher than similar products
• Long service life
• Dimensionally stable
